

Application Guide

BLOCKSIL GRAFFITI FREE

A unique one-pack external permanent coating designed to give effective protection against both graffiti and fly-poster attack, cleans with water

Surface Preparation:

All surfaces must be clean and dry, remove any soiling by power wash (≤ 600 psi).

Any soiling/graffiti apparent on painted surfaces i.e. masonry /rendered walls should be re-painted with good quality masonry exterior paint, prior to Graffiti free application.

Application:

Apply by brush or roller.

Method:

Application temperatures $+5$ to $+50^{\circ}\text{C}$.

Apply first coat and allow to fully dry 3-4 hours (subject to temperature).

Note: Film thickness to be determined by Blocksil Technical Department depending on substrate and porosity

Treated area is protected against graffiti and poster attack when final coating is fully dry.

Exposure controls / personal protection

Avoid contact with eyes and skin. Do not eat, drink or smoke during work. Remove contaminated, saturated clothing immediately. Wash hands before break and after work.

Eye Protection:

Wear goggles.

Hand Protection:
